Libby (fec) to Troy line rebuild

With all the bad things happening to Libby with asbestos being found all over, people have found their dreams contaminated. Some people have been greatly affected and some have lesser problems. There seems to be an effort to clean up and return their lands and dreams, but some have lost more than anyone can repay. I think if WR Grace could do it all over with what they know now, they would do things differently. We know that you are a huge government agency and you can do what you want to us our anyone else you chose to take land from. Please remember you have a chance to allow our dreams in Bighorn Terrace on lots 61 and 62 live. With the proposed move of the power lines away from almost all the homes and properties in Bighorn Terrace, by relocating one or two of the new poles among the many poles to be replaced, you can keep our dream of Libby alive. By making this small change you could add a huge amount of value to the Libby area. What you or we do to Libby affects the future of Libby from now to as far as anyone can see. Please don't let this opportunity slip away from you.

Please help,
